Plex Server Onboarding

Hello

I have stolen a lot of things and now you get to look at them. This page will facilitate your doing of that.

Fucking what?

Plex. It's like Netflix but it isn't. It streams the things that I put on it and what I put on it is stolen goods. You're going to be a victim of my tastes, I'm afraid but, at the end of the day, it's free. That is the justification I use for ignoring the input of others.

Brad, you dolt! You ignorant buffoon! I don't know where or how to even watch this, you roadside melon!

Wow coming on a little strong there but I'll help you out, regardless.
You can watch stuff:

- on your iPhone
- on your Android phone
- using the Windows app
- using the Linux Flatpak image or Snap
- in any web browser in The Plex Web App
- on your Roku
- using the app on your Mac

as well as pretty much any other device that has a screen on it.

Credentials

Username: pp3v3@pm.me
Password: Good2knoW

Unless you have been given different instructions directly from Brad
ALWAYS USE THE PROFILE "FRIENDS"

If you have any questions, comments, concerns, or want to be able to request movies and shows, you can reach me via Email, on Mastodon, or _**bradg.** on Discord.
